                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            RESULT 36
A36665
Balit protein 1 precursor - fruit fly (Drosophila melanogaster)
C;Species: Drosophila melanogaster
C;Date: 30-Apr-1991 #sequence_revision 30-Apr-1991 #text_change 02-Aug-2002
C;Accession: A36665, A1640; Si3523
R;Rothberg, J.M.; Jacobs, J.R.; Goodman, C.S.; Artavanis-Teakonas, S.
Genes Dev. 4, 2169-2187, 1990
A;Title: slit: an extracellular protein necessary for development of midline glia and cd
A;Reference number: A36665; MUD:91099665; FMID:2176636
A;Accession: A36665
A;Status: preliminary
A;Molecule Type: mRNA
A;Residues: 1-1480 - ROT>

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ò
Conditional like protein - Lymantria dispar nuclear polyhedrosis virus
C; Species: Lymantria dispar nuclear polyhedrosis virus, LdMNPV
C; Date: 29-Oct-1999 #sequence_revision 29-Oct-1999 #text_change 09-Jul-2004
C; Accession: T30499
R; Kuzio, J.; Pearson, M.N.; Harwood, S.H.; Funk, C.J.; Evans, J.T.; Slavicek, J.M.; Rohr A; Ticle: Sequence and analysis of the genome of a baculovirus pathogenic for Lymantria of A; Reference number: Z20836; MUD:99124785; PMID:987315
A; Accession: T30499
A; Status: preliminary; translated from GB/EMBL/DDBJ
A; Residues: 1-53 < KUZ>
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          A;Molecule type:~mRNA

metallothionein - chicken

C;Species: Gallus gallus (chicken)

C;Species: Gallus gallus (chicken)

C;Species: 13-Jul-1990 #sequence revision 13-Jul-1990 #text_change 09-Jul-2004

C;Accession: A34958; SO1750; JQ0030; A28113

G;Accession: A34958; Andrews, G.K.

J; Nutr. 119, 309-318, 1989

A;Title: Structure and expression of chicken metallothionein.

A;Reference number: A34958; MulD:89141100; EMID:2645390

A;Status: preliminary; not compared with conceptual translation

A;Molecule rype: mRNA

A;Residues: 1-63 - FER.>

442125
trophozoite cysteine-rich surface antigen 170 - Giardia lamblia
N.Alternate names: CRP170; cysteine-rich surface antigen CRP170
C;Species: Giardia lamblia
C;Species: Giardia lamblia
C;Species: Giardia lamblia
C;Accession: A42125; B42125; S00330; S48056
